**Keywords:** footbridges, design, architecture, urban areas

The paper presents three designs of pedestrian bridges, developed for architectural competitions organized in Poland.

### Footbridge over the Bug River in Niemirów (2013)

The presented project was developed to accordance with the terms of the competition term that the costs may not exceed PLN 7 million. A steel hanging structure with a wooden deck was proposed

### Footbridge over Vistula River in Warsaw (2017)

The Bridge was shaped as a communication route across the Vistula River, with an extension on the Praga side. It is a ribbon bridge with single ropes and low pylons that do not compete with the city skyline.

#### Design of Berdychowska Footbridge in Poznań (2018)

The footbridge connects the center of Poznań with Ostrów Tumski Island and the university campus. It is an arch bridge with five spans. The result is an interesting object with great aesthetic and functional qualities.
